COLD WEATHER CONCRETE PLACING NOTE:

All plans submitted after November 1 of any calendar year must include details relating to concrete placing in cold weather. Details must include the following:

1. Mix and admixture type
2. Temperature schedule of material temperatures
3. Indicate how concrete will be insulated and length of time the insulation and forms will be in place

Concrete will not be placed if temperature at 6:00 a.m. is lower than 0º. 6:00 a.m. temperature must be forecast to rise if work is to be started. All masonry work must be enclosed and heated if temperature falls below 20º. Insulating protection must remain in place for not less than 24 hours.
